LLMS® –Lyons Laboratory Management System

The Product Testing System for the Laboratory

Lyons Information Systems, Inc.®

www.lyonsinfo.com

About LLMS

- Streamlines garment and fabric laboratory testing process.
- Web-based system designed for rapid & comprehensive throughput of testing jobs
- Enter product results from which pass/fail determinations are automatically performed and reported using a versatile, robust reporting engine
- Easily view distribution of work within the laboratory at specific steps

Features

- Easily customized to meet business requirements
- Completely user-managed & administered
- Allows requestors to easily request product testing before test product is sent to laboratory
- Allows laboratory staff an a priori view of work being requested in order to provide an evaluation of the requestor requirements
- Provide the laboratory an easy way to respond to the requestor with meaningful questions regarding technical, financial, and timeline issues
- Secured content that is fully-managed by appropriate manufacturer's staff
- Easily view real-time "job-load" statistics to see where bottlenecks are present at key junctions of the testing process
- Graphically displays job volumes and each key point
- Automatically updates job-distribution across the laboratory
- Utilizes an extensive query system to allow users to ask questions of product testing information being collected during product-testing

Value

LLMS improves your competitive edge by:

- Increasing efficiency by simplifying data capture and automatic data analysis
- Swiftly creating flexible final testing evaluation reports and integrating data from external user bases

FAQS

- **Must I first own LQATS to use LLMS?**

No, LLMS is an independent product testing system.

- **Do the same licensing provisions apply to LLMS as to LQATS?**

Yes, the same policy of no-seat licensing, free support for hosted systems, software escrows, data imports, and local management of the system are included.

- **How are specifications managed?**

For each industry type, specifications are grouped into test method templates. Still, Lyons usually assists with unusual specifications, if necessary.
