Lyons QMS Audit Pro Benefits

Create Audit Plans, conduct Audits, and monitor non-conformances within one tool and achieve End-to-End Traceability.

Securely integrate data from disparate systems and functions into the audit process for a complete view of the organization.

Define company-wide audit and checklist templates which can be re-used when creating and performing audits.

Make Auditing an Effortless & Automated Process

Create an audit report with pertinent audit information such as; audit summary, non-conformances, and audit participants.

Access and perform audits from any location via your tablet or smart phone.

Take action quickly and confidently by linking data sources from different modules into powerful dashboards.

Use analytics across the audit process, from risk assessment to reporting, and for all audits for greater risk oversight and uncover hidden issues previously unavailable.

Drill down across product lines, find the root causes of quality issues, and implement corrective actions with precision.

Store all company's audit records in one secure and centralized cloud-based system.
