ABOUT

QATS is a robust, flexible, web-based solution that gathers, analyzes and displays quality audit results generated by staff and suppliers of a manufacturing organization. QATS offers a global quality system solution for the apparel industry. Staff and suppliers are empowered to create, manage, and report audit information in a secure data environment. QATS gathers real time quality audit information from suppliers (shipment audits), company auditors (final and pre-production audits), distribution centers and manufacturing plant sites located around the world.

VALUE

QATS improves your competitive edge by providing clear and accurate visibility of real-time quality performance information of your suppliers and plant sites. Information is power. Problems are quickly identified, performance trends are discovered, and solutions may be effectively applied to improve your bottom line.

FEATURES

- Easily customized to meet your business requirements
- Completely managed and administered by users
- Quick search of data using many different query parameters
- Defects definitions easily managed by category and type
- Complete style information management including tolerances, measurements, etc.
- Supports multiple AQL levels
- Ability to manage sampling plans data and map to AQL levels
- Roles based security for managed user access to information and functions
- Tabular and graphics reporting with output to Excel, PDF, and HTML formats
- Real time global performance monitor
- Disposition Log
- Change History Log
- Perform Fabric Inspections
- Six-sigma analysis
- Integrates with all major legacy database systems
- Uses a non-proprietary database (SQL Server)
- Hosted and un-hosted solutions are available

REPORTS

- Audit Defects Breakdown Summary
- Receiving Audit Summary
- Overall Supplier Quality Ratings – OQL
- Overall Location Quality Ratings
- Targeted Supplier Trends
- Targeted Supplier Performance
- Supplier Audit Performance Comparisons

CONCLUSION

QATS offers a powerful, maintainable, and affordable solution to quality audit information tracking and reporting. LYONS' web-based solution offers the unique flexibility to meet your business needs rather than forcing your business to fit its needs around the solution.
